SCHILLER
INTERNATIONAL UNIVERSITY

Bachelor of Arts in International Relations and Diplomacy

Political and economic problems today transcend international boundaries: Schiller International University's Bachelor Degree in International Relations and Diplomacy program offers students an international curriculum which encompasses scientific, technological, cultural and humanitarian concerns, as well as the more traditional areas of diplomatic activities.

Schiller International University students initially pursue courses of study in liberal arts, in order to give them a thorough foundation in history, economics, political science, and international relations.

In their final two years of study, students will go on to apply their analytical skills to case studies, debates, and on-site visits.

The international relations program equips students with the expertise they need to pursue careers with international organizations, in law, government, business, or journalism, and to move onto graduate programs in political science and international relations if desired.

"Schiller is much more than solid education – it is a school for life. At Schiller I have met fellow students from all over the world – many of whom are very close friends today. I believe in Schiller as this university widened my global perspective as well as developed my understanding for other cultures and mentalities. Today, as a Member of Parliament in Germany dealing with foreign affairs, European politics, United Nations matters and international cultural affairs I greatly benefit from my Schiller experience. In my opinion Schiller International University is the best address for an international education."

Harald Leibrecht,
Member of the German Parliament
(Deutscher Bundestag)
MBA - Class of 1983
